

PGH₂O RAVE:

The PGH2O Recognition and Appreciation of Vendor Excellence (RAVE) Profile is an initiative from our Supplier Diversity Program that highlights one of our 68 outstanding diverse businesses.

Supreme Traffic Control (STC) is an MBE-certified vendor with six years of experience providing reliable, safe, and efficient traffic management services. STC's 110 employees serve clients throughout Pennsylvania, including Peoples Gas, A. Merante, M. O'Herron, and Noralco, among others.

STC has supported PGH2O's water and sewer construction projects since 2018. Traffic control is critical to our everyday work to lessen the impacts on Pittsburgh residents and communities. In 2023, they provided complex and strategic traffic services for our Urgent Lead Line Replacement program, ensuring flexible and prompt attention to requests. When construction necessitated lane closures around Children's Hospital, STC prioritized ambulance and bus movement without creating delays. Their 100% attendance and 0 incident record helps PGH2O deliver on our core values of Safety and Accountability.

Our long-term partnership with STC is made possible by their willingness to go above and beyond to help the PWSA team. Their responsiveness, efficiency, and reliability ensure we can continue protecting public health and delivering quality water services. We recognize and appreciate STC for their vendor excellence.
